Time 10 AM Previous Request Sent To \_\_\_\_\_

This Request Sent To Sgt. Alexander

Nature Of Request \_\_\_\_\_  
(See Back Side)

Please State Your Request (1) Clock to be able to tell times —  
this is essential in order to prevent bed sores we  
have to rotate every two hours. Its also imp.  
as a Muslim to be able to track the time to  
prayer. (2) Imam (chanlain) of the Islamic  
Faith to me spiritual needs. (3) Increase temp to  
approximately 70° - cold masks [REDACTED]

Inmate's Signature [Signature]

Response / Action Taken On Your Request A clock is not provided as the Medical  
Staff is Available 24 hrs a day to inform you when you need to turn. Millions  
upon Millions of Muslims pray daily with the Benefit of a watch  
or clock, one will not be provided. I have had the Jail Ministry Staff Contact an  
Imam in order for him to arrange visits as of yet he has not contacted me. I will  
tell you that in the past I have had no luck in being able to have members of the Muslim  
Faith come here to visit inmates. A temperature check indicated it was 70° in your cell

Please State Your Request My requests to remedy issues  
about ① clock ② iman ③ temperature regulation have been  
ignored. Please inform me on how these will be  
remedied. Again the cold temperature masks  
"chills" that I have that translate into medical  
issues i.e. [REDACTED] etc. If  
the facility is unable or unwilling to regulate  
temperature than health at risks.

This is the second request I have received, the clock and the  
temperature have previously been responded to, I will not address them  
again. It is a knowingly false statement to now claim that you have been  
ignored. Iman: I cannot make anyone come see you who does not want to,  
I am not responsible for providing you with an iman I simply can't deny  
you access should one want to come see you. Apparently they don't.

Nature Of Request See below -  
(See Back Side)

Please State Your Request I discussed temperature control with  
Sgt Alexander. I told him my concern of reporting  
"Sunday" temperature reporting to Maj Patterson as  
a false representation of daily temperatures i.e.  
turning up the heat and then taking the temperature  
reporting in 70's. That is a false representation of  
jail temperature (average) in the infirmary during the  
cold months, and thermometer request denied.

Inmate's Signature [Signature]

Response / Action Taken On Your Request \_\_\_\_\_

Sergeant Alexander did report the temperature to me  
it has either been 70 or 72 when he has taken the readings  
we will continue to take the readings. I do not believe  
the readings are false at all. your claim of temperature  
during the cold months has no basis whatsoever seeing how you  
have only been here 19 days

I see that you approved her punishment. She further threatens to escalate a more things to do" if I continue. I'm just documenting this to make you aware just in case she described it to you differently. Instead of punishing me perhaps putting a temperature gauge in the room for 1 week

Inmate's Signature Nidal Hasan to document the drops instead of heating up the room and taking a spot temp

Response / Action Taken On Your Request MD, MP if

You were never threatened and you know it, 67°? how did you come to that conclusion? Please document everything, I can assure you that we are. Being given instructions to make your bed or change your linens routinely is nowhere near a threat it is an order from your Dr. You need to follow orders Hasan

Please State Your Request Good afternoon, Sir, please inform staff that  
files marked privileged are not to be read. I had an incident  
where I was told to leave my privileged file in their care while I  
was in recreation. I protested, but they reassured me that it would  
be on the window<sup>ledge</sup> where I would be able to view it at all times.  
Not more than 15 minutes into my recreation it was taken  
by one of the guards<sup>(Mr. Berry)</sup> and he was peering inside of it. I immediately  
went to him and made eye contact - he put it back on the window ledge.
